|----------------|------------------|
| Aspen          | 900 Cords        |
| Jack Pine      | 200 Cords        |
| Scrub Oak      | 200 Cords        |
| Mixed Hardwood | 60 Cords         |
|                |                  |

**Harvest Requirements:**

Cut all merchantable trees that contain one or more pulp sticks that are in the harvest area. No trees may be left over the red line. No trees are allowed to be dropped across the blue line. Avenza is strongly encouraged for this sale due to the amount of brush along the south blue line and all the blow down on the east blue line. If decking in any opening minimal disturbance is required in these openings. This is a 2 year contract with all the blow down needing to be cut within a year of the start of the contract. This amounts to about 20 acres of storm damage.
